

Information for Carers

Learning outcomes: .

- Understanding that scientists share their discoveries.
- Understanding that science is something that everyone can experience and everyday items can be used.
- Understanding that scientists don't know the answers to every question and use scientific methods to explore these questions further.

Resources:

Have your Discovery Box ready for this session

Prep for this session

One of the experiments uses a raw and a boiled egg. Adults, please prep the boiled egg, but don't tell your child which one is raw and which one is boiled. You can number them '1' and '2', and remember which is which.

A cup or bowl with tap water, spoon, (newspaper, towel)

A glass half filled with water, a newspaper or magazine picture

2 balloons and 2 strings approx. 30 cm long

The Disappearing Pencil Puzzle which can be found at:
